

Spare Parts, Actuator Repairs and Consignment Stock

Actuator repairs are incredibly important to ensure the optimum performance of your weighing machine. Ignoring zero drift errors, for example, can seriously compromise the accuracy and performance of your machine.

Actuator Repairs

Only Yamato offer Genuine Spare Parts, Repairs and Service of Yamato Equipment.

We can offer:

- Actuator unit repair complete within 7-10 working days
- Genuine Yamato parts only
- Repairs performed by fully trained Yamato engineers
- 6 month warranty on all repairs.

Yamato Official Repairs

All Yamato repairs are carried out with precision and excellence by our qualified and experienced engineering team who have successfully passed rigorous Yamato training.

Yamato Genuine Parts are used in all our repairs so you can have peace of mind that the quality of your machine is maintained. All our repairs come with a comprehensive 6 month warranty.

Yamato Genuine Spare Parts

Only Yamato can supply genuine spare parts which are made with the finest materials ensuring longevity and unrivalled reliability.

Yamato are renowned for their high-quality premium parts and are thus the best way of maintaining the optimal performance of your machine.

Every new part sold through Yamato comes with a comprehensive 12 month guarantee.

Everything comes with the knowledge and re assurance that this is genuinely part of the service from Yamato UK.

Reduce Your Business Risk

Modern companies need to assess their business risk at every opportunity.

Risk is everywhere but the production environment is particularly vulnerable. Compliance with European Machinery legislation such as PUWER and the H&S at Work Act, both require vigilant processes and procedures.

At Yamato, we try and help companies with their compliance by ensuring our machines are kept safe and risk free from defective parts or dangerous modifications. Our highly qualified engineers only fit genuine spare parts which have been thoroughly tested and fit for purpose.

This provides the security that a customer's Yamato machine is never questioned on CE Certification or in any risk analysis. Compliance is never in doubt which protects customers against potential claims for machines being fitted with parts which have not been subject to the original certification process and which may cause injury or harm.

Typical benefits include:

CE Certification is never in doubt. Risk of shock or defective parts is never an issue and the machine performance can be monitored properly.
