

# Upgrades and Refurbishments

Maximise the potential of existing equipment at your site.

## Upgrades and Refurbishments

Yamato actively supports its equipment for many years, within this time your machine may benefit from an upgrade (screen upgrade) or a refurbishment to increase efficiency.

Speak to our engineer to find out if your machine would benefit from this service.

We offer comprehensive upgrades from screens to loadcells to ensure your equipment will last long in to the future and be supportable.

## Loadcell Protection Upgrades

Certain machines may benefit from a loadcell protection upgrade, ask your technician if this would be recommended.

Benefits could include reduced repair costs and a more robust machine.

We offer extra protection loadcell units for high impact forces. If your product causes high impact forces then please discuss this option with your technician.

## Command Console Upgrades

Upgrade your Command Console and future proof your machine. Benefit from a faster processor, an increased number of product programs and more.

Contact your area representative to discuss your options.

We can offer command console upgrades to Sigma weighers, this upgrade can replace obsolete equipment and future proof you weigher for the foreseeable future.
